

A success story goes on: the 3in1 feeder

The principal of the 3in1 is brilliant: 3 different consistencies of feed are offered to the piglets & finishers at the same time

- Fodder (dry feed)
- Porridge
- Fresh water

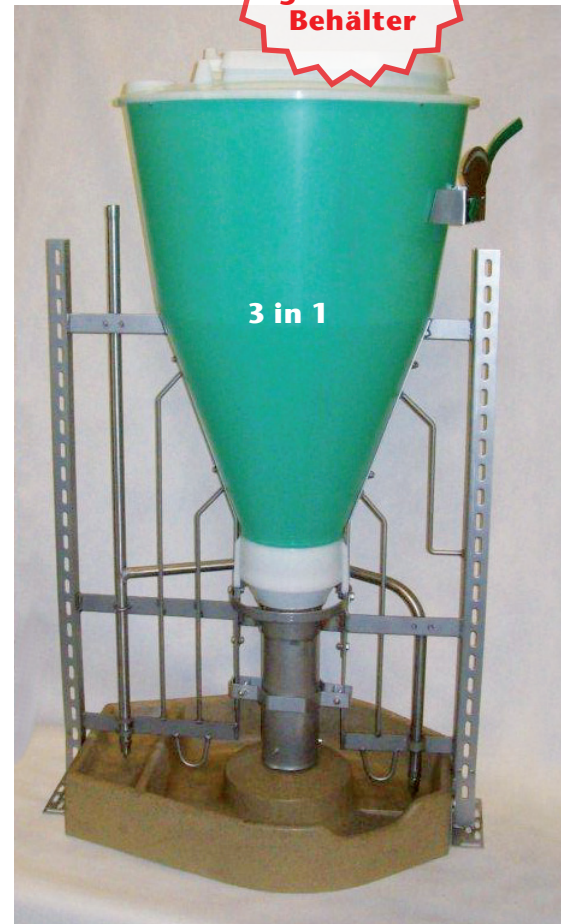

The pigs can choose which components they want to take. This ability is stimulating the feed intake. Taking water & feed

at the same time is also reducing stress in the group. You can measure the effect: excellent daily gain from wean to finish. The key of success is the polymer concrete part of the feeder which was constructed focusing absolutely on the animal.

- new hopper: 20% extra volume
- weaners & finishers with excellent results
- highest operational reliability and focus on the animal
- fit for meal & pellets
- easy to handle

- stainless steel
- transparent polypropylene hopper
- extremely long durability
- minimum wasting of feed
- highest standard of hygiene
- made in Germany

Technical Data/Produktbeschreibung 3 in 1 NX

	Mini 60 W	Maxi 70 W	Maxi 80 W
Water pressure:	2 – 2,5 bar		
Installation:	between or in the center of the pens		
Type of feed:	meal or pellets		
Measuring unit:	principal of oscillation		
Size of frame:	940 mm	1100 mm	1100 mm
Broadness:	620 mm	740 mm	840 mm
Filling volume:	120 l	120 l	120 l
Piglets < 35 kg:	30 -40	40 -50	bis 75
Finishers < 115 kg:	–	30 -40	bis 50
Drinker nipples:	2	2	3
Feeder:	2 water unit 1 mix unit (water & feed)	1 water unit 1 mix unit (water & feed)	2 water unit 1 mix unit (water & feed)
