

## FIBER EQUIPMENT

Strong panels for all types of farming equipment

- Customizable design
- Solid core → Improved hygiene
- Durable and flexible
- High resistance to wear and tear
- Easy to clean

# FIBER EQUIPMENT

Durable material for farming equipment

## DURABLE MATERIAL

The equipment is made of fiber plates and has a thickness of 10 mm. It makes it space efficient without compromising the quality. Fiber plates are very strong and durable.

## SOLID EQUIPMENT

Fiber plates is suitable for housing equipment for pigs and cattle, among other things. The equipment is available with chamfered edges, which minimizes the risk of injuries. The equipment helps to maintain a high level of hygiene, and is bacterial resistant.

## QUALITY CONTROL

The quality is very important, so the fiber plates undergo several tests to ensure top quality. The testing takes place in Denmark and include the following procedures:

- Measurement of the plates' resistance to immersion in boiling water
- Test of the plates' impact resistance
- Thickness control
- Test of the plates' flexibility
- Test of the plates' hardness in surface and core

Solutions for Farrowing and Gestation

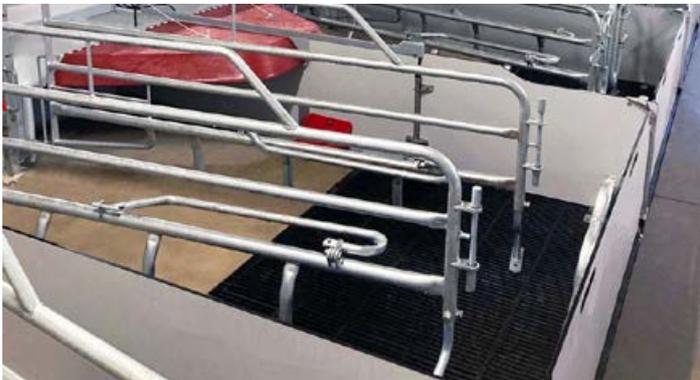

## Farrowing pen for loose sows: WELSAFE

Modern farrowing pen for loose nursing sows.

## Loose farrowing pen: FT30 (from birth to 30 kg)

Natural way for free farrowing where piglets can stay up to 30kg.

## Farrowing pen: INN-O-CRATE

Traditional farrowing pen, high weight at weaning.

## Penning equipment for sows & boars: INN-O-FLEX

Group pen for free gestation sows.

## Farrowing pen: FUNKI

Traditional farrowing pen, strong construction.

“ We can keep a higher level of hygiene with Funki Fiber. It is easy to clean.

It also gives more space to each individual farrowing pen.

Peter Faurhold, Denmark
