

# Volume Dispenser VD2

## Minimum maintenance

The VD2 volume dispenser is made of plastic, providing long life and minimum maintenance.

## Constant overview

The look-through container ensures precise overview and complete control of the feed distribution to the pen.

The cylindrical shape ensures free airflow with no risk of downdraught.

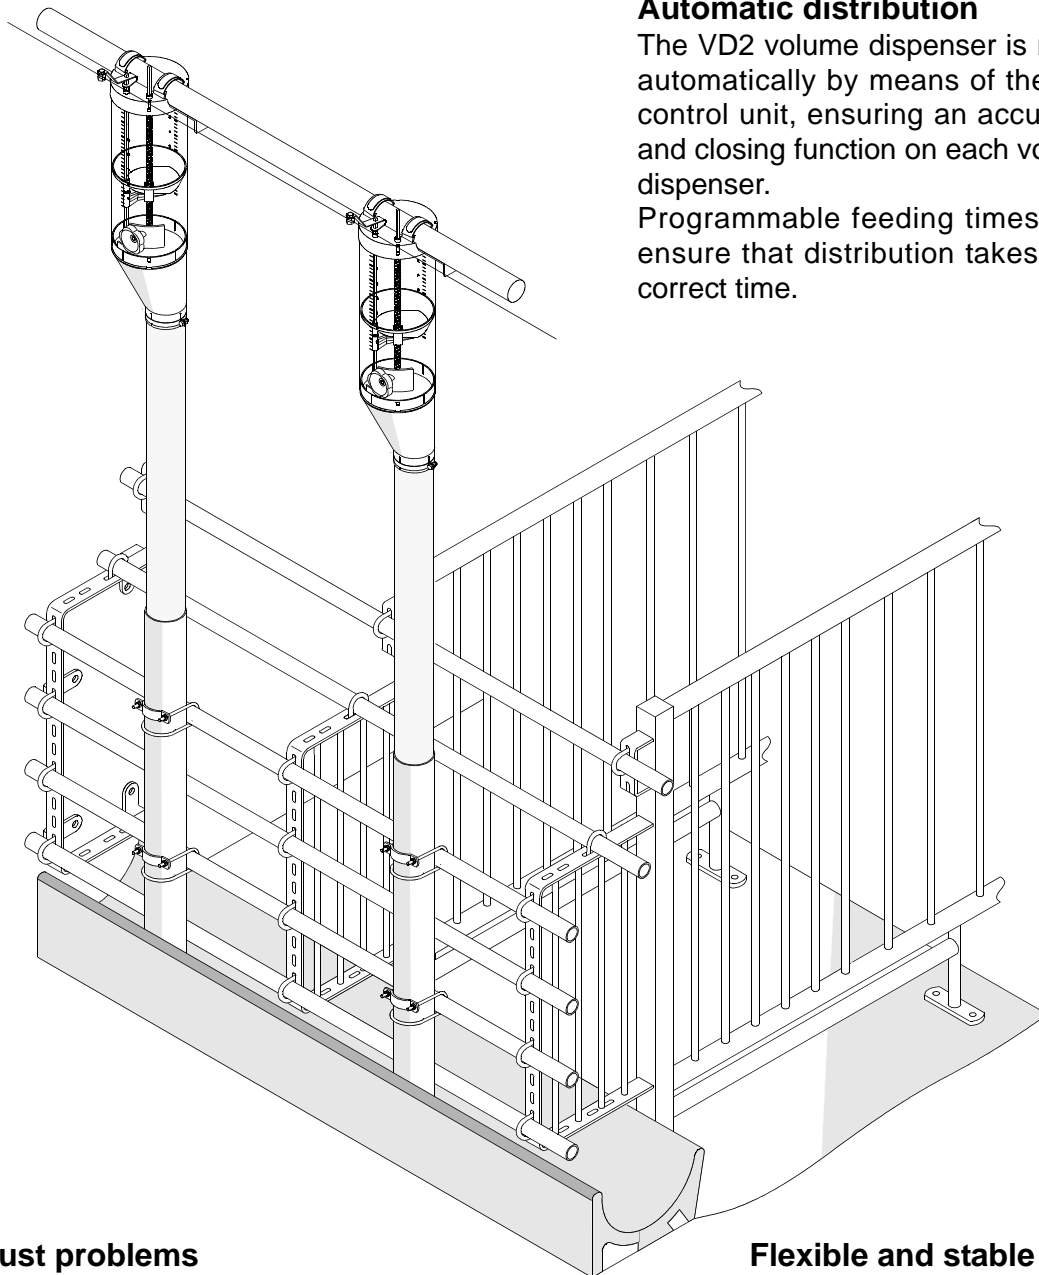

## Accurate dosage - easy adjustment

The VD2 volume dispenser is easy to adjust manually with the adjustment handle on the side of the container, ensuring accurate dosage even of small feed quantities.

## Automatic distribution

The VD2 volume dispenser is released fully automatically by means of the Funki Feed control unit, ensuring an accurate opening and closing function on each volume dispenser.

Programmable feeding times furthermore ensure that distribution takes place at the correct time.

## No dust problems

The sealed construction prevents dust problems and contamination from outside the system.

## Flexible and stable installation

The asymmetric outlet funnel ensures flexible installation in all types of pens.

**The VD2 volume dispenser is available in 4, 6 and 8 litre versions**
