Polymer troughs

Complete, individual trough solutions with focus on:

- functionality
- animal welfare
- efficiency
- reliability
- durability

ACO Funki - innovative pig production systems

Innovation is not just having good ideas. It's also putting them into practice. At ACO Funki, ideas are transformed into functional products, systems and services, capable of creating real value for professional pig producers.

ACO Funki was established through the merger of Funki and Durofarm. As part of the ACO Group, we are a strong player in the market for complete animal housing systems. All our products meet the strict requirements necessary to achieve success in modern pig production.

Innovation requires experience, synergy and efficiency. In the ACO Group, we can draw on the know-how of 3,200 competent employees distributed among 25 production facilities and 60 sales offices covering all parts of the world.

ACO Funki Group Head Office

ACO Funki

The most complete, well-designed trough system on the market

Troughs for any purpose

ACO Funki offers a wide range of polymer concrete troughs for pig pens.

We are thus able to provide flexible individual solutions for single or modular troughs for all pig categories.

We have designed our troughs, which all are renowned for exceptional quality, on the basis of over 30 years' experience.

We focus on adapting trough design to the feeding behaviour of pigs, thus minimising feed spillage, wastage and mess.

- In short, our objective is to optimise feed utilisation through perfect trough function.

This brochure describes some of the products in our range of troughs for pigs.

- functionality
- animal welfare
- efficiency
- reliability
- durability

ACO Funki offers complete, individual, fully integrated housing systems, dry and liquid feeding systems, transponder control, PC management, milling and ventilation. Our customers are thus ensured effective cost reduction in all areas of production.

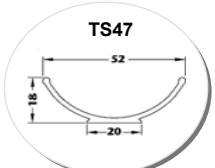

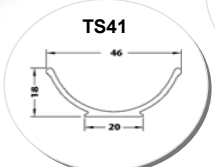

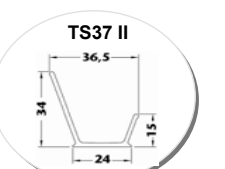

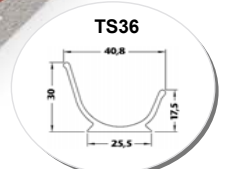

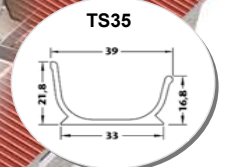

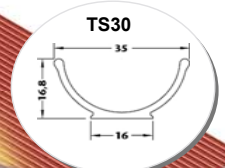

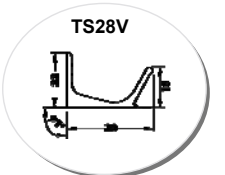

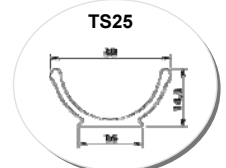

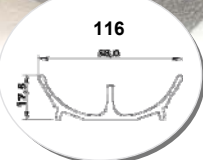

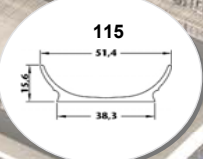

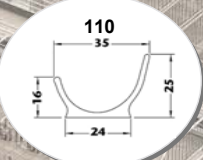

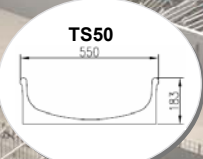

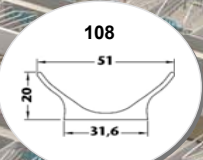

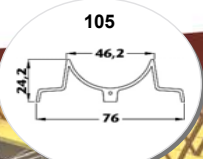

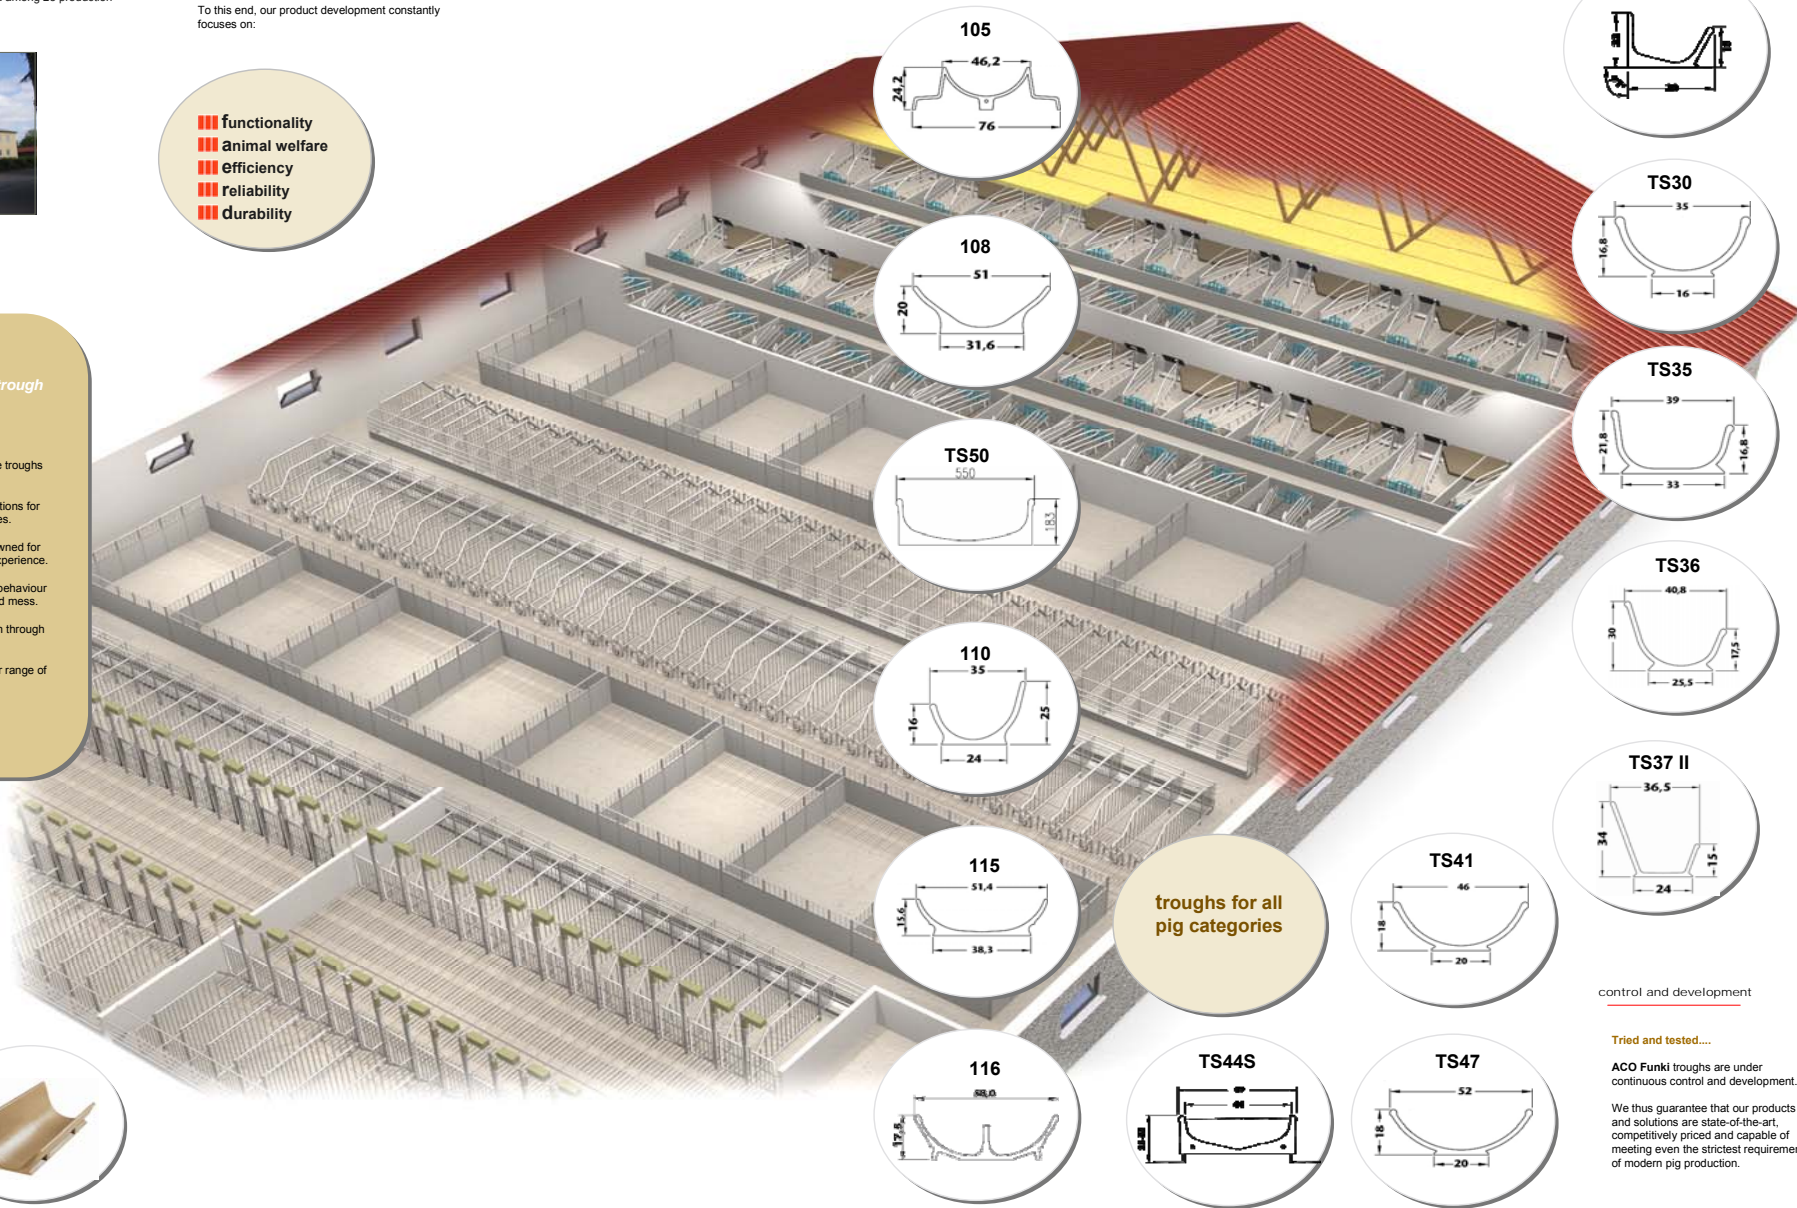

ACO Funki aims to be the most innovative supplier on the market. New products are therefore constantly launched and classified as such, e.g. we have for many years set the standard for feeding and housing systems.

We have both the will and the means to reach our goal: *helping our customers become among the most competitive on the market.*

To this end, our product development constantly focuses on:

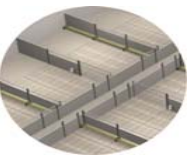

polymer troughs from ACO Funki

- easily cleaned for maximum hygiene
- acid-resistant material
- robust
- modular
- flexible
- optimum feeding behaviour
- perfect function

troughs for all pig categories

Selected products from our range

control and development

Tried and tested....

ACO Funki troughs are under continuous control and development.

We thus guarantee that our products and solutions are state-of-the-art, competitively priced and capable of meeting even the strictest requirements of modern pig production.
