NN DRINKING CUPS

The drinking cup has a rounded shape, which ensures no blind corners. The closed design on top of the cup prevents manure in the drinking cup. It helps to always keep the cup clean. The water nipple is placed in the bottom of the drinking cup and releases only the amount of water, that pigs actually can drink. This means considerable water savings and considerable reduction in the quantity of manure.

SPECIFICATIONS

Description	For	Pigs per cup	Mounting height (lower edge of cup to floor)	Dimensions, cm (W x H x D)

Min. open	-	3,0 l/min

DRINKING BOWL FOR PIGLETS

Drinking bowl specially designed for piglets. The special drinking nipple is activated by a light pressure from the piglets, which makes learning easy.

The drinking bowl's rounded shape, without blind corners, ensures that the cup is easy to keep clean, thus providing top hygiene.

The adjustable drinking nipple can be placed close to the bottom of the bowl, which leads to quicker learning and less water wastage. It provides good water economy.

The drinking bowl is made of stainless steel, which ensures long durability. All in all - the optimum solution for piglets in farrowing pens.
