

# STRAWSYSTEM

DANISH DESIGN | GERMAN QUALITY | GLOBAL EXPERIENCE

# AUTOMATIC STRAW ALLOCATION

## Advantages:

- 1 Capacity: 2-11 liter per dosing
- 2 Can handle up to 4 cm bedding material
- 3 Triggers automatically or with a manual button
- 4 Almost unlimited number of dispensers (450-650)
- 5 Large Ø76 mm pipes and special chain for transporting bedding
- 6 Improves the working environment
- 7 Regular bedding reduces feed consumption in pregnant sows
- 8 Better udder health for the cows
- 9 Simultaneous dispensing reduces dust in the barn
- 10 Can handle chopped large bale straw directly in the mixer
- 11 Fewer cases of eye infections in the animals

## Can deliver straw multiple times daily

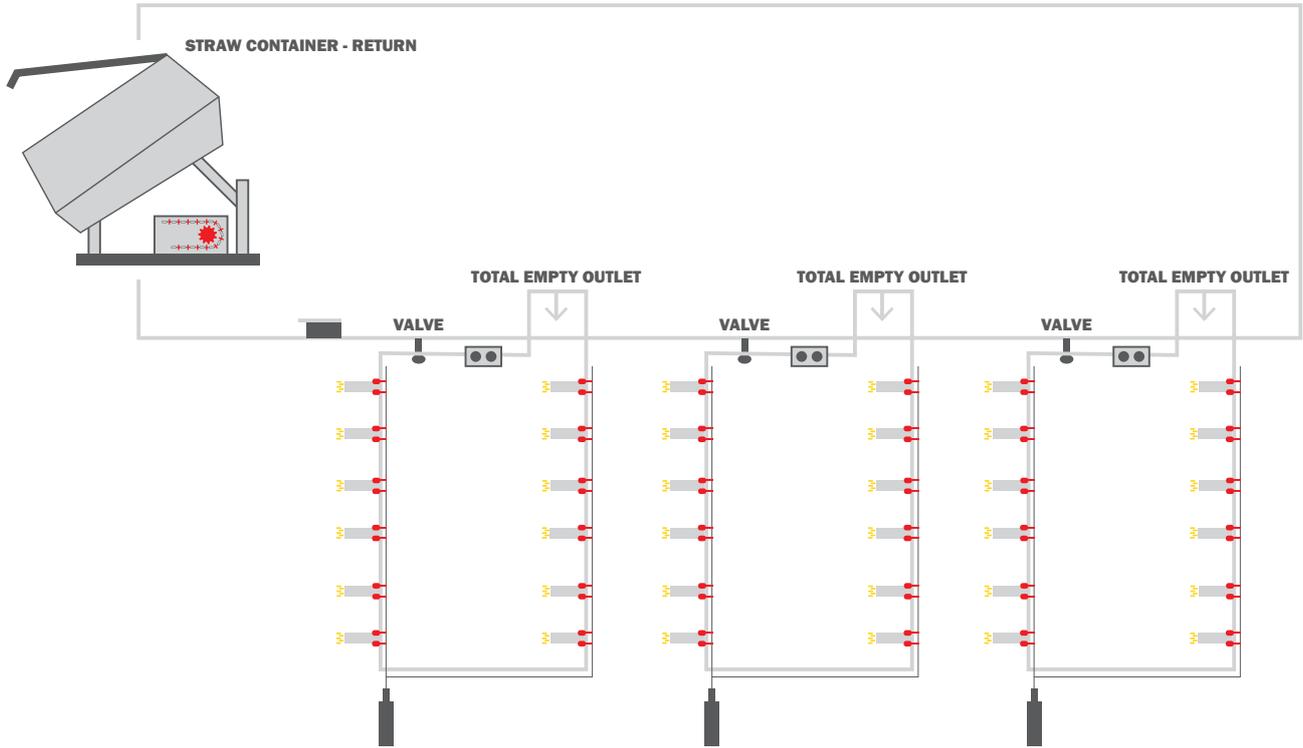

Funki MultiStraw is our innovative transport system for chopped bedding. The system is designed to optimize the distribution of straw for pigs and cattle, resulting in improved animal welfare and increased productivity.

With Funki MultiStraw, you save time while also achieving a better working environment.

By ensuring a constant supply of fresh straw, our system helps maintain a clean and comfortable environment for the animals. This improves health and productivity, benefiting both you and your animals.

Funki MultiStraw is a complete solution that includes all the necessary components for an efficient distribution system. To ensure long-lasting durability, we use high-quality materials.

### SYSTEM

The system is built according to the farm's design and needs. Often, there will be a filling system that supplies a sectional system, allowing access to all corners of the barn. It is possible to operate up to 400 meters on a single system.

- Capacity: 2-11 liters per dispensing unit
- Can handle bedding material up to 5 cm
- Dosing several times a day
- Distributes according to a schedule or manual trigger
- Container from 4000 to 8,000 liters

**CAN BE USED FOR DIFFERENT TYPES OF BEDDING, INCLUDING STRAW AND SAWDUST**

With a straw rivet, you gain a range of benefits that make the work easier and more efficient. The system offers several solutions that are fully automatic and suitable for both large and round bales. It is simple and reliable, meaning you can use your own straw without any issues. The time-saving feature and the closed system significantly reduce dust problems, ensuring a cleaner and more efficient work process.

### MANUEL

Solution with manual filling of the container. It is simple and reliable. Well-suited for filling with bedding that has been chopped by an external straw chopper and purchased in bags or loose.

### PRECHOPPED BIG BALES

Automatic solution for chopped large bales. It is well-suited for filling with large bales that have been chopped to a maximum straw length of 40 mm. Shredding and filling occur automatically. The belt length can be increased as needed in increments of 2.5 meters.

### BIOGAS

Chopped straw for the animals increases the dry matter content in the slurry, resulting in better slurry settlement and increased gas production.

## TESTIMONIALS

“We used to distribute the straw the old fashion way, with a wagon and a shovel. Now, we have a Funki straw system. It saves us about four work hours weekly, and now we don't have any dust nuisance..”

*Britt Brøchner-Nielsen  
Denmark, Cattle production*

## TESTIMONIALS

“We provide straw four times daily to about 1700 sows with this system and have a significant labor saving as a result”

*Mogens Krogsgård,  
Denmark, 2.700 søer*
