

## CHAIN PROGRAM

POWERLINE® and MASTER CHAIN® for dry feeding systems

### ACO FUNKI CHAIN PROGRAM

38 mm	400 kg/hour
50 mm	700 kg/hour
60 mm	1000 kg/hour
76 mm	2000 kg/hour
100 mm	6000 kg/hour
160 mm	21000 kg/hour

### MASTER CHAIN®

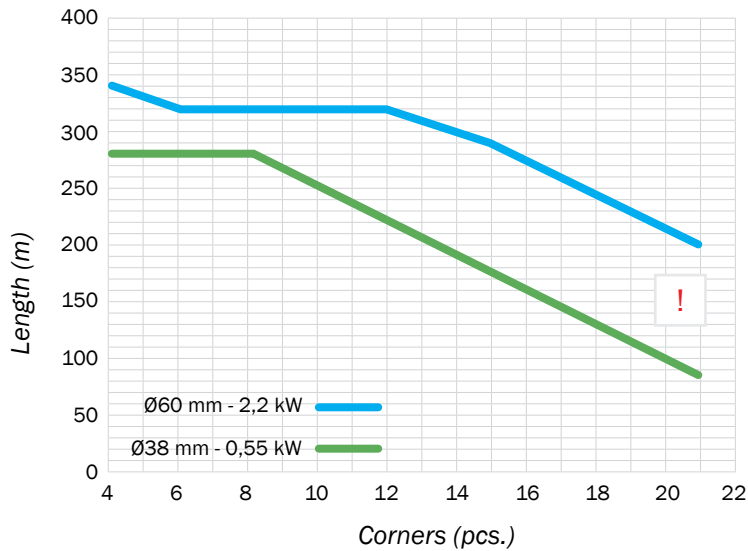

- Extremely strong
- Made of galvanized and hardened steel
- Minimum twist of the chain - optimized dependability
- Long durability

### POWERLINE®

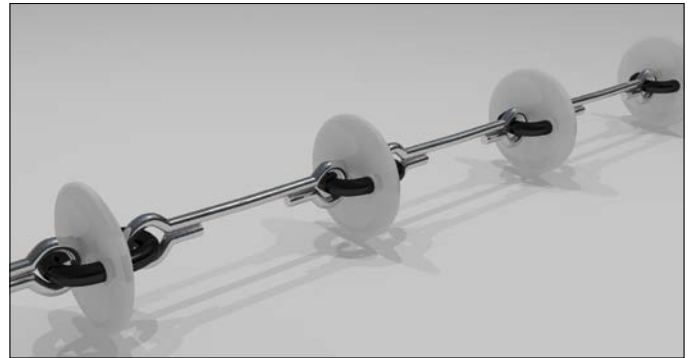

- Extremely strong and lightweight
- Made of hardened steel
- Long durability

# CHAIN PROGRAM

POWERLINE and MASTER CHAIN for dry feeding systems

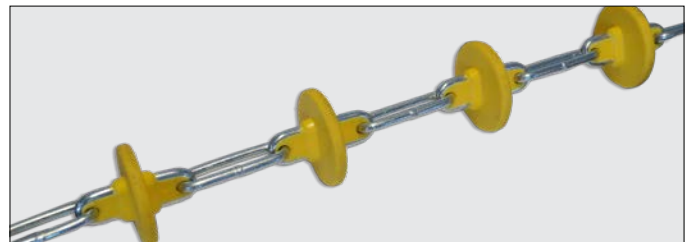

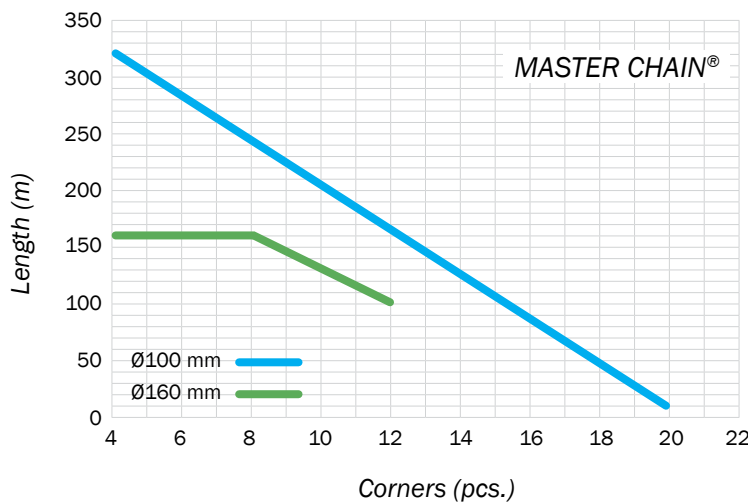

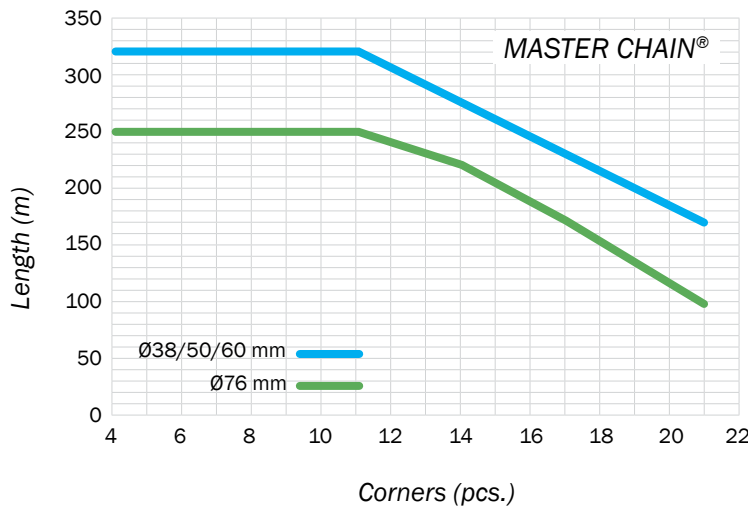

## CHAIN AND WIRE

### ▲ POWERLINE® - extremely strong

- Strong and durable - PowerLine is made of two types of specially hardened steel that ensures long durability
- The Powerline chain is quality tested between each joint - self-emptying drive unit that easily releases the chain

! The displayed length works only if the system is emptied before stop. If the system stops with feed in the pipeline, the maximum length is minus 50 meter.

### ▲ MASTER CHAIN®

- Minimum wear and tear of the system, easy to mount - 20% lighter than other chains
- The construction ensures minimum twist of the chain - optimized dependability
- Durable - hardened and galvanized. Nylon - very strong plastic material

Subject to changes in materials and design is reserved.
