Stainless steel feeder for Wean to Finish

Wet-/dry feeders for Wean to Finish are available with features and options designed to meet the specifications and expectations of today's modern pork production systems. Manufactured using corrosion resistant 304 stainless steel and welded construction, these feeders are engineered for durability, ease of cleaning, simple management and superior feed conversion performance.

The edge of the feed trough reduces feed waste and is designed for extra robustness and easy cleaning.

The adjustment system requires only two adjusters per feeder, providing quick, accurate and consistent control of feed gate settings.

The trough with dividers to separate eating places. Water for pigs comes out of the press valves in the trough.

Testimonial:

“ We have chosen the wet/dry feeder from Funki, and have now been testing it for six months. We have seen good results...

... The edges make it very easy to clean, and we find the feeder easy to dose.”

Anders Rahbek
