FEED PARTITION

For loose sows in groups

Feed partition mounted against wall

Feed partition with front pipes

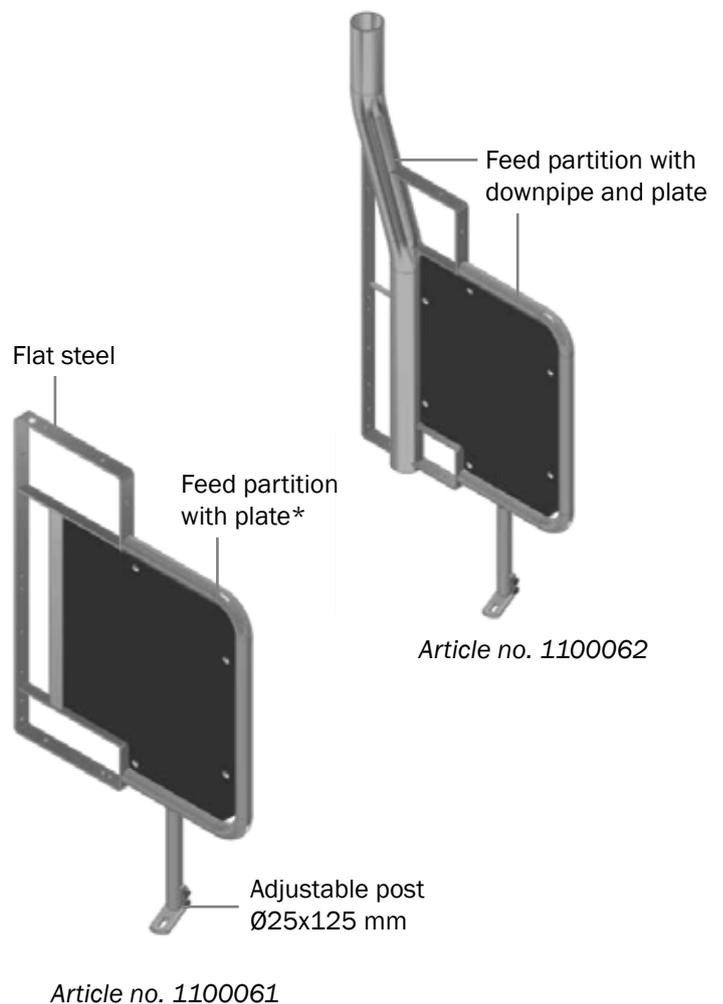

Feed partition mounted on PVC board profiles

FEED PARTITION

is a good way to separate loose sows during the feeding. The feed partitions are available with or without fully integrated downpipe for dry feeding. It is also possible to use with polymer or stainless steel trough.

It is proved on practice that using of the feed partitions significantly reduces level of stress among the animals and, as a consequence, ensures better animal welfare.

* Also available with steel plate.
