

COMBI

Farrowing pen for loose nursing sows

- The farrowing crate is adapted to the sow's anatomy and can be adjusted to the sow's dimensions; gives a safe farrowing
- The crate side ensures that the piglets have free access to the utter
- Tilttable wings minimize the risk of crushing
- Work efficient arrangement; easy to work and easy to clean
- Strong and well-proven design; long durability
- Corner-mounted trough provides optimal space for the sow
- Optimal working conditions around climate corner

COMBI FARROWING PEN

Optimum use of square meters...

We have many years of experience in production and development of farrowing pens, including COMBI farrowing pen, which is a classic in our program. COMBI farrowing pen is especially successful in Norway, because it meets the local requirements about the loose nursing sows on a minimum additional consumption of square meters. The new design with corner-mounted trough contribute further to the optimum function of the COMBI farrowing pen.

The space-saving corner trough in our COMBI farrowing pen maximizes space for the sow in the pen. Besides, the good space around the creep box ensures comfortable working conditions for the staff.

The COMBI farrowing pen is available as a traditional or as a sideways farrowing pen. The pen can be mounted on a fully drained floor.

COMBI farrowing pen

Pen length:	300-320 cm
Pen width:	200-230 cm
Volume trough:	21 liter

- 1 Side height 75 and 100 cm.
- 2 Rear height 100 cm.
- 3 Gate height 100 cm.
- 4 Combi farrowing crate XL with powder coated rear gate and corner trough for concrete floor or plastic slats.
- 5 INN-O-CORNER creep box 90 cm
Incl. lid for heating lamp.

Please contact us for further information about Combi farrowing pen.
