

HR 6 - 97

Funki Climate Controller Type HR 6 - 97

The easiest controller from Funki has been optimized in 1997 and is suitable for all houses requiring a simple ventilation system.

The controller is used where minimal regulation is needed. Example breeder houses.

Controlled by temperature with variable regulation of ventilator up to 6 amp.

With possibility to connect motor regulator for extra ventilators.

With possibility to connect servo motor for exhaust damper or wall inlet.

This product is very reliable, easy to install and user friendly.

Functions

- 220 V mains voltage
- Output for motor 6 amp.
- Built in fuse max 6 amp.
- 0 - 10 V output for additional motor regulators
- 0 - 10 V output for additional servo motor
- Automatic stop of motor (adjustable)
- Adjustable min. tension
- Adjustable max tension
- Adjustable Xp-band
- Automatic ventilation in event of sensor failure
- EMC- tested and CE marked
